The Behavioral Health Division has spent the past year and a half building a network to provide the necessary substance abuse treatment services to our AODA population. We would like to thank all of the agencies in Milwaukee County that have come into our network for the services that they are providing.

One goal of Wlser Choice was to improve the service array and foster client choice in selecting service providers. This program has enhanced the Recovery Support Services array and increased client choice of providers.

The Behavioral Health Division is committed to serving Milwaukee County residents.
